Visual #1

Field	Details
Page	Sales Overview
Chart Type	KPI Card
Visual Title	Total Revenue
What It Shows	Total company revenue is 29.36M
Key Insight	This KPI represents the overall financial scale of the business. It acts as the primary success metric that reflects total market demand and sales performance across all categories and regions.
Business Decision	This should be used as a baseline benchmark for all departments. Future growth targets should be set relative to this number, and performance of categories, regions, and campaigns should always be measured against its contribution to total revenue.

Visual #2

Field	Details
Page	Sales Overview
Chart Type	KPI Card
Visual Title	Total Profit
What It Shows	Total profit is 12.08M
Key Insight	The business is not only generating strong revenue but also maintaining a healthy absolute profit. This shows that the pricing structure and cost management strategy are overall effective.

Field	Details
Business Decision	Focus should shift from only increasing revenue to improving operational efficiency and reducing cost leakage in low-margin categories.

Visual #3

Field	Details
Page	Sales Overview
Chart Type	KPI Card
Visual Title	Profit Margin %
What It Shows	Profit margin is 41.15%
Key Insight	A 41.15% margin indicates strong profitability and efficient pricing strategy. However, dependency on high-margin categories may create long-term risk if market conditions change.
Business Decision	Maintain current pricing model but continuously optimize procurement and operational costs to sustain margin stability.

Visual #4

Field	Details
Page	Sales Overview
Chart Type	KPI Card
Visual Title	Total Orders
What It Shows	Approximately 28K total orders

Field	Details
Key Insight	Order volume shows consistent customer engagement and demand stability across the product portfolio.
Business Decision	Increase average order value by introducing bundles, cross-selling strategies, and promotional offers.

Visual #5

Field	Details
Page	Sales Overview
Chart Type	Line Chart
Visual Title	Monthly Revenue Trend
What It Shows	Revenue trend from July 2016 to July 2019
Key Insight	The business shows a fluctuating early phase with a noticeable dip around late 2017, followed by a strong upward trajectory after mid-2018. Peak performance occurs in 2019, indicating successful scaling and improved market penetration.
Business Decision	Identify what operational, marketing, or product changes occurred after mid-2018 and replicate those strategies. Additionally, investigate causes of early-period decline to avoid recurrence.

Visual #6

Field	Details
Page	Sales Overview
Chart Type	Bar Chart

Field	Details
Visual Title	Revenue by Product Category
What It Shows	Bikes, Accessories, Clothing revenue distribution
Key Insight	Bikes dominate with 28.3M revenue , while Accessories (0.7M) and Clothing (0.3M) contribute marginally. This indicates extreme dependency on a single category (~97% Bikes).
Business Decision	Diversify revenue streams by investing in Accessories and Clothing through marketing, product expansion, and pricing optimization strategies.

Visual #7

Field	Details
Page	Sales Overview
Chart Type	Donut Chart
Visual Title	Category Sales Mix
What It Shows	Percentage contribution of each category
Key Insight	Bikes account for approximately 97% of total revenue , creating a high concentration risk. Any decline in this category would significantly impact overall business performance.
Business Decision	Reduce dependency risk by strategically expanding non-bike categories and increasing their market visibility.

Visual #8

Field	Details
Page	Product Analysis
Chart Type	Bar Chart (Top N)
Visual Title	Top 10 Products by Revenue
What It Shows	Highest revenue generating products
Key Insight	A small number of flagship products contribute disproportionately to total revenue, demonstrating a strong Pareto distribution effect. These products act as revenue anchors for the business.
Business Decision	Ensure consistent stock availability, prioritize marketing budgets, and avoid stockouts for these high-performing products.

Visual #9

Field	Details
Page	Product Analysis
Chart Type	Bar Chart (Bottom N)
Visual Title	Bottom 10 Products by Revenue
What It Shows	Lowest revenue generating products
Key Insight	Several products show extremely low demand and minimal contribution to total revenue, indicating poor market fit or low visibility.
Business Decision	Either discontinue, bundle, or apply promotional pricing to improve performance or reduce inventory cost burden.

Visual #10

Field	Details
Page	Product Analysis
Chart Type	Clustered Column Chart
Visual Title	Revenue by SubCategory
What It Shows	Revenue distribution across bike subcategories
Key Insight	Mountain Bikes and Road Bikes dominate subcategory performance, while other subcategories contribute significantly less. This shows clear demand concentration in performance-oriented bikes.
Business Decision	Increase production capacity, inventory allocation, and targeted marketing for high-performing subcategories.

Visual #11

Field	Details
Page	Product Analysis
Chart Type	Column Chart
Visual Title	Profit Margin by Category
What It Shows	Category-wise profitability comparison
Key Insight	Accessories deliver the highest profit margins despite lower revenue contribution, indicating strong profitability efficiency in this segment.
Business Decision	Reallocate marketing focus toward high-margin categories to improve overall profit efficiency.

Visual #12

Field	Details
Page	Product Analysis
Chart Type	Scatter Plot
Visual Title	Price vs Quantity Sold
What It Shows	Relationship between price and sales volume
Key Insight	Low-priced products generate high sales volume, while premium products generate higher revenue per unit despite lower volume. This shows a dual-market structure.
Business Decision	Maintain a balanced portfolio strategy targeting both mass-market and premium segments.

Visual #13

Field	Details
Page	Product Analysis
Chart Type	Stacked Bar Chart
Visual Title	Revenue by Product Color
What It Shows	Sales distribution across product colors
Key Insight	Black-colored products dominate sales significantly, while white products underperform, suggesting strong customer preference patterns.
Business Decision	Investigate design, demand, and marketing issues in underperforming colors and optimize product assortment accordingly.

Visual #14

Field	Details
Page	Customer Insights
Chart Type	Bar Chart
Visual Title	Revenue by Occupation
What It Shows	Revenue contribution by customer profession
Key Insight	Professional customers generate the highest revenue (~10M), indicating higher purchasing power and preference for premium products.
Business Decision	Focus targeted campaigns on professional segments with premium product offerings.

Visual #15

Field	Details
Page	Customer Insights
Chart Type	Column Chart
Visual Title	Revenue by Income Bracket
What It Shows	Revenue distribution across income groups
Key Insight	Majority of revenue comes from the \$30K–\$100K income group, making this segment the core customer base.
Business Decision	Design pricing strategies, promotions, and product bundles tailored specifically for middle-income customers.

Visual #16

Field	Details
Page	Customer Insights
Chart Type	Donut Chart
Visual Title	Sales by Gender
What It Shows	Gender-wise sales distribution
Key Insight	Male and female customers contribute almost equally, indicating balanced market penetration across genders.
Business Decision	Maintain neutral marketing strategies without gender bias while optimizing product appeal for both segments.

Visual #17

Field	Details
Page	Customer Insights
Chart Type	Donut Chart
Visual Title	Married vs Single Customers
What It Shows	Marital status-based sales distribution
Key Insight	Both married and single customers contribute almost equally, showing that lifestyle segmentation is more important than marital status alone.
Business Decision	Develop marketing campaigns based on lifestyle behavior rather than marital status classification.

Visual #18

Field	Details
Page	Customer Insights
Chart Type	Bar Chart
Visual Title	Revenue by Cars Owned
What It Shows	Revenue distribution based on car ownership
Key Insight	Customers without cars generate higher revenue, indicating reliance on bicycles for transportation or budget-conscious behavior.
Business Decision	Target cost-effective and utility-focused product lines for non-car owners.

Visual #19

Field	Details
Page	Territory
Chart Type	Map Visual
Visual Title	Revenue by Country
What It Shows	Geographic distribution of revenue
Key Insight	United States and Australia dominate revenue generation, while Canada underperforms significantly.
Business Decision	Strengthen marketing strategy in low-performing regions and investigate barriers in underperforming markets.

Visual #20

Field	Details
Page	Territory
Chart Type	Clustered Column Chart
Visual Title	Revenue by Region
What It Shows	Regional revenue comparison
Key Insight	Australia leads regional performance, while Central region shows weakest contribution.
Business Decision	Identify operational gaps in weak regions and improve distribution efficiency.

Visual #21

Field	Details
Page	Territory
Chart Type	Bar Chart
Visual Title	Revenue by Continental Group
What It Shows	Revenue by continent
Key Insight	North America leads slightly, followed by Pacific and Europe, indicating relatively balanced global performance.
Business Decision	Expand aggressively in Europe and Pacific markets to diversify geographic revenue risk.

Visual #22

Field	Details
Page	Budget vs Actual
Chart Type	Clustered Column Chart
Visual Title	Actual vs Budget by Month
What It Shows	Monthly actual vs budget performance
Key Insight	Several months consistently fall below budget, indicating seasonal or operational inefficiencies in meeting targets.
Business Decision	Improve forecasting accuracy and implement stronger monthly sales execution strategies.

Visual #23

Field	Details
Page	Budget vs Actual
Chart Type	KPI Card
Visual Title	Budget Attainment %
What It Shows	Budget achievement is 98.38%
Key Insight	Performance is close to target but still slightly underachieved, indicating minor execution gaps.
Business Decision	Identify small operational inefficiencies causing the gap and optimize execution processes.

Visual #24

Field	Details
Page	Budget vs Actual
Chart Type	Bar Chart
Visual Title	Actual vs Budget by Category
What It Shows	Category-wise performance against budget
Key Insight	Bikes meet or exceed targets, while other categories consistently underperform.
Business Decision	Rebalance resource allocation and improve performance in weaker categories.

Visual #25

Field	Details
Page	Budget vs Actual
Chart Type	Line Chart
Visual Title	Cumulative Revenue vs Budget
What It Shows	Running total comparison of actual vs budget
Key Insight	Early-period underperformance creates cumulative gap, even though later performance improves and narrows the difference.
Business Decision	Focus on improving early-year execution to prevent long-term cumulative revenue gaps.
